An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 1, on line 15, "through hole (275(x))÷," has been changed to –through hole (275(x));--.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach a liquid analysis system having a plurality of sample containing units with a multiplexer for electromagnetic radiation, among other features, comprising: a first part having a first outward through hole connected to a source of electromagnetic radiation and a first return through hole connected to a detector in which the holes are spaced apart with a distance; a second part having a plurality of second outward through holes and a plurality of second return through holes arranged in equidistantly spaced apart pairs, wherein the first part is moveable relative to the second part from a first position in which the first outward through hole is aligned with a second outward through hole and the first return through hole is aligned with a second return through hole to a second position in which a first outward through hole is aligned with another second outward through hole and the first return through hole is aligned with another second return through hole.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
